

With version 8.5 issued to supported users we are already working hard on developments for future releases.

The new versions will increase the range of applications of the software in addition to further refinements to existing modules. This increase in development effort is the result of a further increase in the size of the Product and R&D teams which reflects our confidence in the future.

Training is an essential and growing part of our business. Responding to customer requests we are introducing a series of Application Courses concentrating on the use of our software for specific applications. The first of the series is for electrical machine modelling and has already been run successfully in Chicago and Oxford.

The Basic Training Courses have always been popular and have been oversubscribed recently. Consequently we have added additional dates to the schedule. We will shortly publish details of the 2002 User Group Meeting Schedule. For full details of both Courses and User Group Meetings please refer to our website.

Dinah Trowbridge

Future Events

February 25-28, 2002

Wireless Systems Design
San Jose, USA

March 18-21, 2002

National Manufacturing Week
Chicago, USA

April 8-11, 2002

IEE Computation in EM
Bournemouth, UK

April 16-18, 2002

IEE Machines and Drives
Bath, UK

April 29-May 2, 2002

Intermag
Amsterdam, Netherlands

June 4-6, 2002

IEEE MTT-S,
Seattle, USA

June 18-20, 2002

Coil Winding
Berlin, Germany

September 23-27, 2002

Microwave Week
Milan, Italy

November 4-6, 2002

Med Power
Athens, Greece

VF Software Training Courses

OPERA-2d Basic: 2 days

OPERA-3d Basic: 3 days

OPERA-3d Advanced: 1 day

Modelling of Electrical Machines
with the OPERA Software: 1 day

CONCERTO Basic: 2 days

*Please refer to our website for a full list
of dates and venues for 2002*
